## **DETAILED ACTION**

### ***Election/Restriction***

1. Upon further consideration by the Examiner and due to the many different embodiments disclosed by the Applicants, the previous Restriction Requirement in Paper No. 6 is hereby withdrawn in view of the following Restriction Requirement.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33, drawn to a method of manufacturing fluid jetting apparatuses, classified in class 29, subclass 611.
- II. Claims 34-36, drawn to a product of fluid jetting device, classified in class 239, subclass 102.1.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of Group II can be made by mechanical machining methods such as the use of saws, blades, etc.

Art Unit: 3729

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

**Species A**, drawn the embodiment of the heat driving part in Figures 4A-4B;

**Species B**, drawn the embodiment of the membrane in Figures 5A-5C;

**Species C**, drawn the embodiment of the nozzle part in Figures 6A-6D;

**Species D**, drawn the embodiment of adhering the membrane and the nozzle part in Figures 7A-7C; and

**Species E**, drawn the embodiment of adhering the membrane and the heat driving part in Figures 8A-8B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there appears to be no generic claims.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3729

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

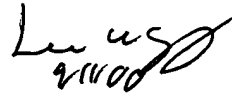

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
